ALMEX mobile POS

ALMEX mobile POS (refurbished)

Mobile passenger management - All service functions for the passenger combined in just one handy device.

PUBLIC TRANSPORT

Product description and application:

ALMEX mobile POS is the all-rounder to go: Sale and control of e- and paper tickets, catering, cashless payment, timetable information, wireless communication and instant receipt printing - and the *ALMEX mobile POS* is still not bigger than a tablet.

Scanner, card reader and printer are integrated in the robust and lightweight magnesium housing. The high-resolution multi-touch display enables intuitive operation, while the ergonomically shaped device fits comfortably in the hand and enables non-tiring work by means of a hand strap - for right- and left-handers.

The powerful lithium-ion battery and intelligent power management enable a long operating time, and the battery can also be changed safely during operation.

Due to the Android-based operating system and its open software platform, the *ALMEX mobile POS* can be easily integrated into existing IT systems.

The *ALMEX mobile POS* is also available as a refurbished version - proven technology at attractive conditions.

Detailed technical information can be found on our website.
