## Product information TC605

### Product description and application:

The TC605 mobile computer expands upon the proven success of the TC601. Utilising the latest Qualcomm® QCM4490 CPU platform, up to 8 GB RAM and 128 GB internal memory as well as WiFi 6E, 5G WWAN and Bluetooth 5.2 for faster data transfer, it now enables even more efficient working.

The Android operating system will continue to be up to date in the coming years and will be supplied with appropriate security patches.

The TC605 is equipped with a 0 or 60 degree scan head – for maximum flexibility.

The improved, easily replaceable 5000 mAh battery allows long periods of use and the Gorilla® Glass 7 on the 6" IPS FHD display as well as the IP65 and IP68 certification provide reliable protection against external influences - even when dropped from a height of up to 1.8 metres.

On request, we offer extensive additional equipment such as a robust protective cover, a hand strap, a shoulder strap, a holster, a pistol grip and much more.

Detailed technical information can be found on our website.
