

ALMEX cashless

Modern stationary ticketing solution – streamlined, intuitive, reliable.

Product information
ALMEX cashless

Product description:

The *ALMEX cashless* is a modular ticket machine specifically designed for cashless ticket sales. A 32" touch display ensures intuitive user navigation, while an optional second display on the back can be used for presenting additional information.

The machine supports a variety of payment methods through integrated modules for cashless transactions, an RFID reader, and a 2D barcode scanner.

The thermal printer with dual paper rolls enables fast and reliable ticket issuance while reducing maintenance requirements. The robust stainless steel housing ensures high resistance to external influences and allows for a long service life.

For additional customer support, a camera, speakers, and a microphone are integrated, enabling direct video assistance. A powerful industrial PC ensures stable and fast processing of all transactions.

Communication is carried out via LAN or mobile network, allowing for flexible installation. The intelligent power supply contributes to energy-efficient operation. The *ALMEX cashless* can be securely installed at various locations using the mounting pole.
