Product information TC603

Product description and application:

Our TC603 is an outstandingly powerful mobile data capture device designed for reliability and ruggedness. With a Qualcomm® Snapdragon™ 660 2.2GHz Octa Core CPU and a modern Android operating system, it enables fast and accurate data collection in any environment.

Thus, the device meets the highest IT security requirements.

Its exceptional durability is reflected in an impressive drop height of 1.6 m, which means it can withstand even the toughest conditions. The built-in Gorilla® Glass 5 in combination with the IP65-certified housing protects the device with its 5.99 inch capacitive touch display from damage and ensures clarity and precision.

With its powerful 4000 mAh removable battery, the handheld is able to support you for a long time.

On request, we offer extensive additional equipment such as a hand strap, touch pen, belt pouch, a charging station and much more.

Detailed technical information can be found on our website.
