ALMEX mobile.cashless

ALMEX mobile.cashless

Product series description:

Small in size, strong in performance – the new ticket machines of the *ALMEX mobile.cashless* series can be easily and flexibly integrated into public transport vehicles. They are designed for operation in compliance with the German Accessibility Strengthening Act (BFSG).

The modern design with a large display ensures intuitive operation and integrates seamlessly into vehicles or transport stations.

The machines support all common cashless payment methods, allowing convenient transactions via debit or credit card. The series features a modular design – from the compact *ALMEX mini.cashless* to extended versions with PIN-on-glass functionality.

A redundant printing system is available for selected models, ensuring high availability and low maintenance, even under intensive use.

The *ALMEX mobile.cashless* series combines advanced technology with robust performance, offering reliable operation in both form and function.

Detailed technical information can be found on our website.
